

Accessories

Here are more useful items of equipment to make handling the boats ashore easier for sailors and their helpers.

Shore Shuttle

Suitable for the Access 2.3 and 303, these dollies are easy to use as they are carpet covered fibreglass and the boats are easily slid on and off by one person. They also have a narrow wheel-base so can handle a range of walkways, doors and ramps. Boats can be launched down a ramp with the centerboard in its case but resting on the fiberglass deck. The Shore Shuttle is so effective that just one may be sufficient for a fleet of up to ten boats.

Keel Caddie

The Keel Caddie is designed to safely and easily transport Access centreboards from storage to waterside. When used in conjunction with a C-Crane, any problems associated with transferring and handling ballast centreboards on shore are removed. Essential for those handling a number of centreboards over any distance, particularly the Liberty boards which weigh 70 Kg. The Keel Caddie will carry up to five 2.3 or 303 centreboards at one time.

Keel Lifters

There are three types of Keel Lifters, one used by volunteers to assist them raise and lower the centreboard while standing alongside, and a 2.3 and 303 telescopic lifters operated by the sailor while under way.

- Volunteer Keel Lifter - 3 part purchase, one piece, hooks onto the centerboard handle
- 2.3 Keel Lifter - 2 piece telescoping tube operated by the sailor, its 4 part purchase shackles onto the centreboard and cleats on the console side
- 303 Keel Lifter - 2 piece telescoping tube, operated by the sailor, its 6 part purchase shackles onto the centreboard and cleats on the console side

Boat Covers & Sail Covers

If your fleet is stored outside in the weather, they can be safely protected from the elements with boat and sail covers. They are easy to fit and remove, and become a cost effective item, as they reduce maintenance and ensure that your boat or fleet remains in top condition. Covers are available for all Access sailcraft.
